

SHRI HARI M

Manual Test Engineer • Senior Test Engineer • QA Engineer
Bangalore, Karnataka, India | m.shrihari04@gmail.com | +91-9789651058

PROFESSIONAL SUMMARY

Senior Test Engineer with 5+ years of experience in software quality assurance with strong hands-on experience in manual testing, functional testing, regression testing, integration testing, system testing, smoke testing, sanity testing, end-to-end testing, UAT support, API testing, database validation, defect management, and release validation. Experienced in analyzing business and technical requirements, preparing test scenarios and test cases, executing test cycles, identifying defects, performing retesting, and coordinating with development, product, architecture, and business stakeholders.

Strong knowledge of SDLC, STLC, Agile/Scrum, defect lifecycle management, test planning, test execution, regression strategy, and release readiness. Hands-on experience with JIRA, Confluence, SQL, Postman, Swagger, REST APIs, JSON/XML, Kafka, Cassandra, Linux/RHEL, and enterprise application integrations.

SKILLS

Manual Testing, Functional Testing, Regression Testing, Integration Testing, System Testing, Smoke Testing, Sanity Testing, UAT, End-to-End Testing, Test Case Design, STLC, SDLC, Agile, Scrum, JIRA, Confluence, SQL, Cassandra, Postman, Swagger, REST API Testing, JSON, XML, Apache Kafka, Java, TestNG, Maven, Selenium, Python, PyTest, Playwright, Jenkins, Git, GitLab, Linux, RHEL, Docker, Kubernetes, Prometheus, Grafana

CORE QA COMPETENCIES

- **Manual Testing:** Functional, Regression, Integration, System, Smoke, Sanity, End-to-End, UAT, Feature, Build, and Release Validation Testing
 - **Test Management:** STLC, SDLC, Test Planning, Test Scenario Design, Test Case Design, Test Execution, Test Coverage, Defect Lifecycle, Defect Triage, Retesting, Release Readiness
 - **Defect Management:** JIRA, Defect Reporting, Defect Prioritization, Defect Tracking, Retesting, Root-Cause Investigation, Closure Coordination
 - **API & Backend:** REST API Testing, Postman, Swagger, JSON, XML, HTTP, Request/Response Validation, Status Code Validation, Backend Validation
 - **Database Testing:** SQL, SQL Queries, Cassandra, Database Validation, Data Integrity, Data Consistency, Application-to-Database Validation
 - **Integration Testing:** Kafka, Adapter Testing, Request/Response Flows, Downstream/Upstream Integration, Message Flow Validation
 - **Automation:** Java, TestNG, Maven, Selenium, Python, PyTest, Playwright, Automated Regression Testing
 - **Tools & Environment:** JIRA, Confluence, Jenkins, Git, GitLab, Linux, RHEL, Docker, Kubernetes, SonarQube, JaCoCo
 - **Methodology:** Agile, Scrum, SDLC, STLC, CI/CD, Defect Lifecycle Management
-

PROFESSIONAL EXPERIENCE

Tech Mahindra

Senior Test Engineer

Bangalore, India

July 2026 – Present

- Execute functional, regression, and API validation for Infinera's network management platform release cycles, partnering with product and engineering teams to maintain release readiness.
- Analyze technical requirements and application workflows to design functional, regression, API, and system-level test coverage for enterprise release cycles.
- Own defect identification and triage coordination across application, API, and system-level testing for ongoing release cycles.
- Collaborate cross-functionally with development, QA, and release teams to translate product architecture and business workflows into test coverage.

Wipro Technologies Ltd

Senior Project Engineer – Quality Assurance

Chennai, India

August 2021 – July 2026

- Executed 300+ manual and automated test cases per release across application, API, NETCONF/SNMP protocol, database, adapter, and container layers for Nokia's enterprise Network Management System, validating release readiness across 10 major releases.
 - Identified and triaged 1,000+ defects across 10 releases via JIRA, driving root-cause investigation and closure coordination with development teams to protect release quality.
 - Validated adapter-to-network communication using NETCONF and SNMP protocol testing, ensuring accurate configuration and monitoring data exchange between the NMS platform and managed network devices.
 - Validated REST API request/response integrity (status codes, headers, JSON/XML payloads) using Postman and Swagger across release cycles, catching backend defects before production.
 - Built and executed automated regression suites in Java/TestNG/Maven, complementing manual test coverage and reducing repetitive manual regression effort.
 - Validated backend data integrity via SQL and Cassandra queries, confirming application-to-database consistency across every release cycle.
 - Validated Kafka message-flow integrity across adapters and downstream services, closing a key gap in inter-component request/response validation for the NMS platform.
 - Monitored release health using Prometheus and Grafana dashboards, validating service metrics and troubleshooting integration issues across Linux/RHEL, Docker, and Kubernetes environments.
 - Led defect triage, sprint planning, and release-readiness reporting within Agile/Scrum ceremonies, communicating test status and risk directly to development, product, and business stakeholders — while completing an M.Tech in Software Systems (BITS Pilani) concurrently.
-

EDUCATION

Master of Technology (M.Tech) in Software Systems

2025

Birla Institute of Technology and Science (BITS Pilani) – Work Integrated Learning Program

CERTIFICATIONS

- GitHub Copilot – Level 2
 - Wipro TalentNext
 - Internal Wipro QA and Agile Certifications
-

ADDITIONAL INFORMATION

- Experience working in enterprise-grade software environments involving complex application workflows, integrations, APIs, databases, messaging systems, and distributed components.
- Strong understanding of software testing lifecycle, defect lifecycle, Agile/Scrum processes, regression strategy, test coverage, and release validation.
- Experienced in working with distributed engineering teams and communicating testing progress, risks, defects, and release readiness to stakeholders.
